

DriveELD Reference Card

This reference card is required to be kept on board and available to present during inspections per FMCSA 49 CFR § 395.22(h).

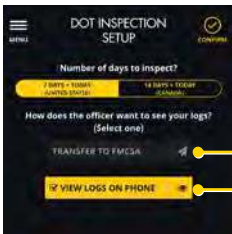

The DriveELD device connects directly into the diagnostic port on your vehicle. Once connected, the ELD will automatically capture and record your driving information. The ELD will transmit this information to your smart device via Bluetooth® which will then be sent securely to the cloud.

DOT Inspection Instructions

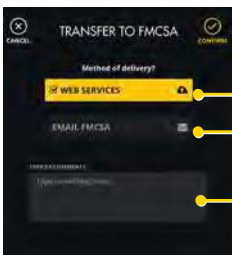

Open the DriveELD App and select DOT Inspection in the main menu.

From there, the logs can either be transferred to the FMCSA or viewed on the phone if there is no internet or data.

Logs can be transferred via web services or email. The enforcement official can request a method.

The officer may request you add a comment. Input that here.

The DriveELD device is registered with the Federal Motor Carrier Safety Regulation (FMCSA) and compliant with FMCSA ELD technical regulations specified in 49 CFR § 395.

DOT Inspection Mode Interface

During Inspection Mode you can access your logs and inspection reports for the past 7 days plus today. For each day, there is a log chart that visually depicts the duration of the driver's activity over the 24 hour period and any vehicle inspection reports the driver created for that day.

View summary of information.

24 hour view of the driver's activities in the log chart.

Navigate between days with these arrows.

Select finish when done.
